DIVISION OF DOCUMENTS

# Inaugural Address

By Mayor Joseph Warren

*Gentlemen of the City Council:*

I am to be your presiding officer for another year, having been elected by the voters of Rochester to again serve as mayor of your city.

I have enjoyed the work of the past year exceedingly, and only hope the next one will be as pleasant.

There are none of us infallible, and I am no exception; but I assure you that the mistakes I have made have been unintentional, for I have endeavored to be fair and just in each instance.

Now that we are assembled to outline our work for the ensuing year, let us use our best efforts in dealing with matters which will improve the conditions of our city.

## SHADE TREES, PARKS AND COMMONS

For some unknown reason a great number of our shade trees have died in the past few years, and it will be necessary for you to give your committee on shade trees, parks and commons a liberal appropriation, in order that they may replace them with young trees.

In the past year the committee have set out two hundred and seven shade trees of various kinds—one

hundred and thirty-five on the Common on South Main street, and seventy-two on streets in different localities of the city—at an approximate cost of fifty cents per tree.

We have a number of small lots at the junction of different streets, commonly called squares, which should be beautified by curbing, grading, and seeded to grass and kept in shape, as such things add greatly to the beauty of our city.

Woodman Square is a most attractive spot, and should ever encourage us in this kind of work. Great praise should be given the residents around Woodman Square for the interest which they have shown, and the time and money which they have expended on the same.

Your committee have in the past year started to improve a small lot on Main street, East Rochester, and one other lot near the Baptist church on Charles street. I understand that the citizens nearby have subscribed quite liberally towards curbing for the latter. I hope that you may deem it advisable to complete this work in the spring.

In my judgment you should appropriate at least five hundred dollars for this department.

#### BROWNTAIL MOTH.

The extermination of the browntail moth is still a perplexing problem. The past year your city has purchased a power sprayer at a cost of one thousand dollars, which gives excellent service. The shade trees throughout your city, numbering more than three thousand, were sprayed twice during the last year at a cost of less than four hundred dollars.

The spraying in the early spring was quite successful, but the second spraying was a trifle late, as the moths had already formed their nests; therefore the spraying was not as beneficial.

The second spraying should be done the first of August each year. I wish to say that the delay of the second spraying was entirely the fault of your mayor.

We are satisfied that spraying, if done at a seasonable time, is the right and the most economical method for the treatment of all tree pests.

The management of this should come under the committee on shade trees, parks and commons.

## PUBLIC BUILDINGS

Various repairs have been made on the Gonic, East Rochester, Allen, and Maple street school houses; also on the Torrent, Gonic, East Rochester, and Cocheco hose houses and the city shed.

The new school house on School street, and a new shed on the city lot, twenty-four by forty-eight feet, (for storage purposes), have been built.

We feel that there will be no need of any more expense in this line for a number of years, as they are all in good repair, and we have school room enough to accommodate a substantial increase.

## SCHOOLS

On the completion of our new school house our schools will have been supplied with ample class room for a number of years.

Your building committee have let all contracts for

the completion of the new School street school house, have paid for the lot, and have furniture to furnish five class rooms, and are still within the appropriation of seventeen thousand dollars.

I wish at this time to thank the committee—Mr. McCrillis and Dr. Annis—who have rendered me valuable assistance throughout the construction.

Our schools, as a whole, are in fine shape, with an able corps of teachers, and Mr. Bacon, as principal of the High School, is doing excellent work.

### HEALTH

Your health officer has been prompt and thorough in his duties in each and every case.

The overseer of the poor is attentive and liberal in all cases.

My attention has not been called to a single case of neglect, and I am confident that there is not a single case of want but what has had immediate attention.

We have been very fortunate in being able to keep within our appropriation.

### WATER AND SEWER

This department has been managed most satisfactorily, and I would recommend the continuation of the present policy, with such changes from time to time as conditions may demand.

### ROADS, BRIDGES AND DRAINS

This subject is ever new, and with all of the knowl-

edge and experience of our engineers, road building is still in the experimental stage.

I find by experience that each location must be treated in a way peculiar to that particular locality.

Our first consideration in road building is the cost of material, for no road can be made without a quantity of good wearing material such as gravel, crushed stone, clay, or hard subsoil.

We have located in various parts of our city such materials as I have described, and in my opinion the greater part of our roads must be constructed with these materials. The question arises how they can be used and treated to be of the most value to our city.

I find that the best method of building a gravel road, when the material is available, is to use forty-nine parts of good, coarse gravel, thoroughly wet and rolled; one part pulverized clay, spread on while the gravel is wet, and worked into the gravel with a spring-tooth harrow; then cover with one-half inch pea gravel, rolled and left to dry; cover with asphalt oil ninety-five per cent asphalt, put on heated from two to three hundred degrees. One half gallon of this oil should cover a square yard. It should be spread evenly and left two days to penetrate the soil, and finally covered with three-quarters of an inch gravel (pea) and rolled. A road twenty-four feet wide built in this manner with material within a mile, will cost approximately twenty-five hundred dollars per mile. It is my opinion that a road of this sort will wear longer and cost less for repairs than any other kind.

On Main street, from the bridge on North Main street to the railroad crossing near the Wallace shoe

shop, I would recommend macadam, with the use of asphalt and tar in its construction.

I would suggest re-covering Portland street, from Main street to the railroad crossing ; and Liberty street, from Main street to Charles street, with crushed stone. Congress street, from Main street to Charles street, and Union street, from North Main street to Wakefield street, should be macadamized. I hardly expect all of this to be accomplished in one season, but I mention it that your committee may consider where, in their opinion, the appropriation can be expended to the best advantage to our city and accommodate the greatest number of people.

Our other streets should be shaped with road machines and rolled with the steam roller in the early spring, when the soil will yield to such treatment. The country roads ought to be shaped and repaired in the early spring.

I find that the road leading to Meaderboro Corner is entirely worn out, and new material must be hauled thereon. This road is traveled by more heavy teams than any other road leading to our city, and I would recommend that a gravel road, such as I have described, be constructed in this place. A greater part of the Farmington road should be treated in like manner.

Your Superintendent of Streets is at present hauling gravel on the old Dover road, which will be shaped and rolled in the early spring.

As to the State road, the condition which confronts us is one which is most unfortunate and perplexing. Although the lay-out as a whole may be satisfactory, the fact that the lay-out is over a part of the city not

traveled by more than five per cent of our taxpayers is most unfortunate for Rochester. It seems to me that this is an exceptional case, and that we would be justified in asking the State to pay seventy-five per cent of the cost of construction.

In the abolition of grade crossings on the Milton road, as prepared by the State and the Boston and Maine railroad, instead of the Boston and Maine paying two-thirds of the grading, as papers filed with your city indicate, the railroad should do the entire amount of the filling in, or pay two-thirds of the entire cost of building from one crossing to another, as per original proposition of the Governor and his Council to me.

The Gonic, East Rochester, Axhandle, one on the Barrington road, and Rochester Neck bridges, and a number of smaller bridges must be re-planked in the early spring.

We should make an estimate of the lumber needed and ask for bids in the open market. I would suggest that we use nothing less than four-inch plank in either case.

#### SIDEWALKS

We have many miles of sidewalks in our city, and the repairs have never yet been realized, as a great deal of this work has been done by the highway department and no separate charge made of the same.

I find by investigation that there has been no system in this work, either as to the lay-outs or kinds of material used. Sidewalks should always be laid on grade, and materials used to conform with the surroundings. For instance: Granolithic should be constructed on Main street and in central parts of our city;

brick and concrete for our compact residential districts; and cinder and gravel on our partially settled streets.

We have a lot of worn concrete sidewalks which should be re-covered. There is at least 7,440 square yards that ought to be covered at once, at an estimated cost of \$2,232. It seems a matter of economy to do this before it gets in such a state that repairing would be impossible. If this work cannot be contracted at a reasonable price the city should provide itself with an outfit, hire an experienced man, and do this work under the management of your street department.

### STREET SPRINKLING

One of our greatest necessities is well sprinkled streets. We need this during our dry season, as it protects our health and adds greatly to our comfort. To accomplish this without the addition of unequal burdens is a most difficult problem.

In my opinion, districts should be laid out, and two-thirds of the cost of sprinkling should be paid by an extra tax assessed on property within said districts, and one-third should be paid from the general funds of the city, as all citizens are benefitted more or less by sprinkling. This work should be done by the street department.

### FIRE DEPARTMENT

Although we have a well organized fire department, I find there are changes necessary and that certain regulations should be made. In most of our fire companies we have men grown old in the service, and it seems that they still remain in the companies; and by so doing they

keep out younger men, who should be taken in occasionally, hence improving and insuring the life of the company. It is ever thus, that age must give way to youth, and I would advise a city ordinance regulating the age, ability, etc., as may seem right and just in your judgment.

In the absence of a fire engine we have no secondary supply of water for fire protection under the present arrangement. I would advise the laying of an eight-inch pipe from the pump at Clark's mill across to Congress street, running thence to Main street and connecting with the hydrant at the corner of Main and Congress streets and with the pipe that crosses to Hanson street corner. This same pipe should be laid through Arrow street to Main street, and connected with a hydrant at each end of Arrow street.

A six-inch pipe should be laid from said pump to North Main street, across to a point near Factory court, and connected with a hydrant at Factory court and another on North Main street, near the north corner of the Hale estate; the approximate cost of the same being one thousand dollars, with no great cost of maintenance. This service should be extended from time to time to meet the demand of the public.

### STREET LIGHTING

Your committee on streets have labored most diligently in re-arranging the lights, and have now one of the best and most thoroughly lighted cities in our State. There have been more than one hundred new lights added at no extra expense of installation or maintenance to the city. According to the terms of our con-

tract we can have all-night lighting for an extra cost of less than \$1,300 per year. In consideration of this fact I would suggest all-night lighting, as it adds very much in the way of police protection and convenience of the general public.

### POLICE

There has been some dissatisfaction expressed in regard to the enforcement of the liquor law. It is difficult to accomplish this with our limited number of policemen without the co-operation of the general public, which is lacking ; and it seems to me that those who do not show any disposition to assist in this matter should at least refrain from criticism.

In every instance where there has been a complaint filed, investigations have followed and, where conditions have warranted, prosecutions have been made, with the result that your police department is not aware of a single place where liquor is being sold illegally at the present time.

In the enforcement of this law all those interested should lend their assistance by reporting to the City Marshal each and every case where, in their opinion, liquor is being sold illegally. I do not state this in the spirit of criticism, but to make known the facts.

Your police are well aware that they must do all in their power to enforce the liquor law, as well as all other laws, to enable them to hold their positions, and in all cases when any one of them fails to do his duty a complaint should be made to your Mayor, as chairman of the police committee, in order that discipline may be maintained and the rights of the public protected.

## EQUALIZATION OF TAXES

The past year your Assessors have made some progress towards the equalization of taxes. Still, it seems to me that they have hardly accomplished the result which the people have a right to expect of them. Without doubt they are much handicapped by the people not giving them a sworn inventory of their taxable property, which should be done by every property owner, as prescribed by law.

This law should be enforced, and in all cases where such inventory is not returned the Assessors should call such delinquents before them and, if a satisfactory explanation is not made, they should be fined and doomed for four times as much as such property would be taxable if truly returned and inventoried according to the law thereon.

It is a most difficult proposition to select a courageous and well informed man for assessor on account of the small salary he receives and the severe criticism to which he is subjected. I feel confident that if this policy is carried out your tax rate would be considerably lower.

## APPROXIMATE FINANCIAL STATEMENT

With the systematic and valuable assistance of our City Clerk, I am able at this time to give you a very accurate statement of the financial condition of the city. Although our books were not closed until Saturday night, December thirty-first, your auditor has been able to submit the following statement :

## LIABILITIES

Outstanding notes,	\$143,705 72
Accrued interest on notes to date,	2,563 83
Sewer bonds,	39,000 00
Accrued interest on sewer bonds,	682 50
City Hall bonds,	65,000 00
Amount due water works account,	10,714 96
	-----
	\$261,667 01

## ASSETS

Amount due on Collector's list,	\$19,496 76
Boston & Maine Railroad stock,	800 00
Cash in hands of treasurer,	19,929 54
	-----
	\$ 40,226 30

Net indebtedness, exclusive of water bonds	\$221,440 71
Water bonds,	\$170,000 00

You will find by comparing this statement with the financial statement of nineteen hundred and nine a net decrease of seven thousand, one hundred and fifty-nine dollars and eighty-six cents on your debt. This includes fifteen thousand two hundred dollars on account of the new school house, and, deducting the amount used for the new school house from the amount of debt, there would be a decrease of twenty-two thousand, three hundred and fifty-nine dollars and eighty-six cents.

I feel that a greater decrease can be shown this year, as there will be no new buildings necessary, and but very few repairs needed on the old buildings.

You will notice by this report that the city owes quite an amount in outstanding notes. These notes are in small denominations, being held mostly by residents of your city, and it becomes necessary to give new notes

to pay old notes, thus increasing the volume of business quite materially.

It occurred to me, as a safeguard, that it might be well in the future to create an office for registration, that each new note might be registered, said register to be open to the public.

#### GENERAL REMARKS

Finally, I will say that my relations with the heads of the various departments have been of the most pleasant nature. Although we have differed in some instances, everything has been settled without discord.

I find that one of our great troubles is extravagance. One cause of this is that we do not deal with matters concerning the city as we would our personal affairs. We should guard against favoritism. The city cannot well afford to give her patronage to any one business concern where it is apparent that the same goods can be purchased elsewhere at a lower price. However, everything being equal, it is needless to say that our resident business concerns should have the preference. The custom of allowing all departments to purchase merchandise without first referring to the proper committee has very naturally led to extravagance.

It seems wise to me, in the interest of economy, for the city to purchase a driving horse and a two-seated democrat wagon, to be kept at the city stable, for the use of all departments, as our stable hire amounts to considerable during the year. It is quite unnecessary for your Superintendent of Streets to use a team all of the time, and this one team would answer for all purposes with a very few exceptions, thus enabling us to deduct the two hundred dollars allowed the Superintendent of Streets for a team.

I have found by examination that we have no plan of our water system or surface sewer, and only a partial plan of our deep sewer. The city should have these plans made at once, with numerous blue prints and with all measurements, as they are constantly needed for reference.

I have asked the Twin State Gas and Electric Company to furnish the city with plans showing the location of their poles and lights; also the Gas Company to furnish a plan of their pipes. I mention this as your city cannot well afford to be without such plans.

Gentlemen, we have with us new members, men of business experience, with new ideas, and we expect them to introduce new measures, and as much as I regret parting with the men who have served the people faithfully and diligently, always trying to do their part, it is right and proper to make such changes.

This is an age of progress, and the people expect new things and improvements in the old. It is right that they should have them, but, in consideration of all matters, economy must be the watchword, and all appropriations must be made with the greatest good to the greatest number of our taxpayers.

I now want to thank you all for the generous support which you have tendered me in the several undertakings of the past year, and I cannot soon forget the many friendly favors which I have received at your hands.

I wish to thank the general public for their confidence in me. I fully appreciate the responsibilities which fall upon me, and I shall try to perform my duties faithfully and honestly.

ness.

# Finance Committee

## Recommendations for Annual Appropriations

We, the Committee on Finance, having considered the amount necessary for the maintenance of the several departments for the year 1911, recommend the following amounts be appropriated for their support:

Sidewalks,	\$ 2,000 00
Health,	100 00
Public Library,	3,000 00
Sampson Post,	150 00
East Rochester Library,	200 00
County Tax,	11,969 85
Street Lights,	6,600 00
Highway Maintenance,	8,000 00
Macadam and Permanent Improvement,	6,000 00
Fire Department,	5,000 00
Interest on City Hall Bonds,	2,600 00
Sewer Bonds,	6,500 00
Interest on Sewer Bonds,	1,137 50
Miscellaneous,	2,000 00
City Poor and Soldiers' Aid,	2,000 00
Schools,	29,000 00
Police,	3,000 00
Coal for City Hall,	500 00
Insurance on City Hall,	885 00
Parks and Commons,	500 00
Salaries,	6,000 00
	<hr/>
	\$97,142 35

# Important Resolutions and Orders

Passed by the City Council

## ANNUAL APPROPRIATION

*Resolved by the Mayor and City Council of the City of Rochester:*

That, for the support of the various departments for the year 1911, there be raised by taxation the sum of ninety-seven thousand, one hundred forty-two dollars and thirty-five cents (\$97,142.35), and the Assessors are directed to assess that amount, with such overlay as may be thought necessary; the interest on notes to be provided for by the amount coming from the State, the balance from the State unexpended to be applied to the reduction of the city debt.

Passed January 13, 1911.

## PRINTING REPORTS

*Resolved by the Mayor and City Council of the City of Rochester:*

That the City Clerk be instructed to prepare for the printer all matter that is to go into the city reports, and that the Committee on Printing be instructed to solicit bids for printing the city reports, and that they be let to the lowest responsible bidder.

Passed January 5, 1910.

## HIRING MONEY IN ANTICIPATION OF TAXES

*Resolved by the Mayor and City Council of the City of Rochester:*

That the Finance Committee be authorized to raise on note or notes of the city, a sum of money not exceeding fifteen thousand dollars (\$15,000.00) in anticipation of taxes, providing it be necessary to do so.

Passed January 5, 1910.

## TO PURCHASE A SPRAYING MACHINE

*Resolved by the Mayor and City Council of the City of Rochester:*

That the Committee on Parks and Commons act with the Purchasing Committee in purchasing a spraying machine suitable for the needs of the city for spraying trees, at a cost not to exceed one thousand dollars (\$1,000.00), and that such sum of money as may be necessary to pay for said machine, not exceeding one thousand dollars (\$1,000.00), be raised on note or notes of the city, and that the said sum constitute a portion of the city debt.

Passed April 5, 1910.

## TO PURCHASE HAND CHEMICAL FIRE EXTINGUISHERS FOR USE AT GONIC.

*To the Honorable Mayor and Council of the City of Rochester:*

BE IT RESOLVED, That the City of Rochester, by

its proper agents, purchase two (2) hand chemical fire extinguishers to be used and stationed at fire department station at Gonic, in compliance with the recommendation of the New Hampshire State Board of Underwriters.

Passed April 5, 1910.

#### TO SELL CITY PROPERTY

*Resolved by the Mayor and City Council of the City of Rochester:*

That the Mayor, in connection with the Committee on Public Buildings, be authorized, when in their judgment they deem it advisable, to sell and dispose of all the vacant school houses turned over to the City Council by the School Board, and the old town house lot, including the lock-up, either at private sale or public auction as they may deem best.

Passed April 5, 1910.

#### SURFACE SEWER ON NORTH MAIN STREET

*Resolved by the Mayor and City Council of the City of Rochester:*

That of the money received from the sale of the old town hall lot and various school house lots, the sum of five hundred dollars (\$500.00) be taken for the purpose of putting in a surface sewer on North Main street, between the stone bridge and Strafford square.

Passed May 3, 1910.

## EMPOWERING THE MAYOR TO GRANT LICENSES TO DIG UP THE STREETS.

*Resolved by the Mayor and City Council of the City of Rochester:*

That the Mayor be empowered to grant licenses to dig up the ground, stone, or concrete in any street, lane or alley, or any sidewalk or common in the city of Rochester for the purpose of putting in gas whenever there shall be a leak or leaks, or whenever the pipes are stopped up, or whenever necessary for putting in service in connection with the same, in accordance with Chapter 12, Section 1, of the City Ordinances; and that said Mayor may grant such licenses with the same authority that the City Council has in that regard.

Passed May 3, 1910.

## EXEMPTING STOCK IN TRADE OF EMANUEL BOOCOCK

*Resolved by the Mayor and City Council of the City of Rochester:*

That the machinery and stock in trade of Emanuel Boocock be exempt from taxation for the term of ten years from April 1, 1910.

Passed May 3, 1910.

## PAINT AND REPAIR ENGINE HOUSES

*Resolved by the Mayor and City Council of the City of Rochester:*

That from the money received from the sale of land

this day authorized, the sum of three hundred dollars (\$300.00) be taken and appropriated for the purpose of painting and repairing the engine houses in said Rochester.

Passed May 3, 1910.

#### HIRING MONEY IN ANTICIPATION OF TAXES

*Resolved by the Mayor and City Council of the City of Rochester:*

That the sum of ten thousand dollars (\$10,000.00) be raised on note or notes of said city and constitute a portion of the city debt; said sum to be raised in anticipation of taxes, and to be paid out of the taxes collected for the year 1910.

Passed May 3, 1910.

#### APPOINTING SPECIAL COMMITTEE TO INVESTIGATE LIGHTING.

*Resolved by the Mayor and City Council of the City of Rochester:*

That the Mayor, in connection with a special committee selected by the Council of said city, constitute a board of inquiry to determine the cost, production and expense to the city of maintaining street lights, either gas or electric; to make a full inquiry with other towns and cities as to the maintenance of similar systems in their municipalities.

The said committee to have full power and authority to investigate in every way the question of street lights in view to making future contracts for street lighting

and determine a policy most satisfactory to the special needs of said city.

Said committee to be recompensed for any necessary expenses which they may be obliged to incur in investigating and ascertaining the required information; such expenses not to exceed a sum of two hundred dollars (\$200.00). Said bills, if any, to be paid from the miscellaneous department.

Passed May 3, 1910.

#### RELATING TO SECRET BALLOT IN CITY ELECTIONS

*Be it Ordained by the Mayor and City Council of the City of Rochester as follows:*

That Chapter 78, of the Laws of 1897, and amendments thereto, shall be in force in the City of Rochester in the choice of city and ward officers, and in all matters where applicable to said city elections.

Passed May 3, 1910.

#### RELATING TO ERECTION OF BUILDINGS

*Be it Ordained by the Mayor and City Council of the City of Rochester:*

That Section 3 of the amendment to the city ordinances relating to the inspection of buildings, passed July 7, 1908, be amended by striking out the word "three-story" in line eight and insert in place therefor the word "four-story," so that Section 3 as amended shall read as follows:

Sect. 3. The exterior and party walls of all buildings hereafter erected, when constructed of brick, or stone, or other incombustible substance, shall be solidly and firmly laid in mortar or cement and properly tied together; and if the building is more than thirty-two (32) feet in height, then the walls to the height of the first story shall be not less than sixteen (16) inches thick, and those above the first story not less than twelve (12) inches thick.

In all four-story buildings the walls of the first two stories shall be not less than sixteen (16) inches thick. And no building hereafter erected of brick, stone, or other incombustible substance shall be built in a range of more than fifty (50) feet measuring along the line of the walls facing the street without the intervention of a brick wall at least eight (8) inches thick. Said wall shall be built up at least eighteen (18) inches above the flat of the roof of the highest building of which said wall forms a part for the full extent of the flat, and the top of said wall shall be covered with a coping of stone, iron or other metal, and where there is a mansard or pitched roof the wall shall be built up to the under side of the roof covering, which roof covering shall be laid and embedded in mortar upon said wall. The provisions of this section shall not apply to single rooms, halls, workshops, or manufactories requiring larger dimensions, or where in the opinion of the inspector the division of rooms will not allow of such partition wall.

All chimneys shall be built of brick or other fire-proof, non-conducting material. All brick flues shall be smoothly plastered inside with mortar from top to bottom, and outside below the roofing. In all cases, chimneys shall rest upon a continuous support of metal or

masonry extending to the ground. All flues shall be topped out at least two feet above the highest part of the roof of the building to which it belongs.

Hearths, fire-places, or grates, shall be laid upon brick or other trimmed arches, or upon bars of iron supporting a bed of brick work. In no case shall a nail be driven into the masonry of any flue.

Passed May 3, 1910.

#### TO ERECT A SIX-ROOM SCHOOL HOUSE

*Resolved by the Mayor and City Council of the City of Rochester:*

That the sum of seventeen thousand dollars (\$17,000.00) be raised on note or notes of said city and constitute a portion of the city debt; that said sum of seventeen thousand dollars shall be used for the purpose of purchasing land and erecting a six-room school house on the easterly side of the Eastern Division of the Boston & Maine railroad. Whenever the School Board has selected a suitable lot for said school house, either in connection with the old lot or on a new location, at a reasonable price, then the same shall be paid for out of the said sum of seventeen thousand dollars, and the balance used to build said school house.

The Mayor, together with one member of the City Council and one member of the School Board, appointed by him, shall constitute a building committee with full authority to erect said school house on said lot as above designated.

Passed May 5, 1910.

### CARE OF OLD CEMETERIES

*Resolved by the Mayor and City Council of the City of Rochester:*

That a sum of not exceeding seventy-five dollars (\$75.00) be appropriated from the Miscellaneous Department to construct and repair a suitable fence around the town cemetery located on North Main street; also to care for the cemetery on Rochester Hill.

Passed July 19, 1910.

### RELATING TO DEALERS IN OLD JUNK

*Be it Ordained by the City Council of the City of Rochester, as follows:*

Amend Section 2 of the ordinance passed September 5, 1907, relating to dealers in old junk, etc., by inserting after the words "old metal" in the first line the words "and other articles therein mentioned," so that section as amended shall read as follows:

Section 2. The fee for dealers in old metal and other articles therein mentioned shall be twenty-five dollars (\$25.00) per year, payable when the license is issued, and for a license for the unexpired time up to the following first day of April a proportionate amount shall be paid for such time; but no license shall be granted for a less period of time than from the date of application to the following April.

Passed July 19, 1910.

## EXTENDING SEWER ON WINTER STREET

*Resolved by the Mayor and City Council of the City of Rochester:*

That a sum of money not exceeding eight hundred and fifty dollars (\$850.00) be raised on note or notes of the city for the purpose of extending the deep sewer on Winter street, also to be connected with new school house on School street, and that the same be made a part of the city debt.

Passed August 16, 1910.

## LICENSING VEHICLES

*Be it Ordained by the Mayor and City Council of the City of Rochester as follows:*

Section 1. The Mayor and Council may, from time to time, grant licenses to suitable persons to set up, employ, or use hackney carriages, or other vehicles, for the conveyance of persons for hire, from place to place within the limits of the city, which license may be revoked at any time for any violation of the provisions of this ordinance; and a record of such license shall be kept by the City Clerk.

Section 2. No person or persons shall set up, employ, or use any hackney coach, cab, or other vehicle for the conveyance of passengers for hire, from place to place within the limits of the city, without a license from the Mayor and Council.

Section 3. Every carriage licensed as aforesaid shall be conspicuously marked with the number assigned to it by the Mayor and Council, in metallic or painted

figures not less than one and one-half inches long, and the driver thereof shall have the same number in legible figures on his cap. The number of the carriage and the rates of fare duly established shall be conspicuously posted on a printed card in every such carriage.

Section 4. No license shall be sold, transferred, or assigned without the consent of the Mayor and Council, and no carriage shall be driven by a minor under the age of eighteen years, unless he be specially licensed by the Mayor and Council.

Section 5. No license granted as aforesaid shall apply to any carriage except the one designated therein by its number, or otherwise made certain, excepting that two carriages belonging to one owner may be licensed under the same number; but for each carriage so licensed the owner shall pay the regular license fee.

Section 6. The Mayor and Council may establish the fare for the conveyance of passengers in any such hackney carriage, and revise or change the same at pleasure; and every such license shall expire on the first day of April next after the date thereof, unless previously revoked.

Section 7. No owner, driver, or other person having charge of any hackney carriage for the conveyance of passengers, licensed as aforesaid, shall demand a higher rate of fare than that established by the Mayor and Council.

Section 8. Every person licensed agreeably to the provisions of this ordinance shall pay for said license the sum of one dollar per carriage.

Section 9. Any person licensed as aforesaid who shall violate any of the provisions of this ordinance, or

any person who shall set up, employ, or use hackney carriages for the conveyance of persons, for hire, from place to place within the limits of the city, without license, shall be fined not exceeding ten dollars, or imprisoned not exceeding thirty days.

Section 10. No person or persons shall set up, employ, or use any job team, wagon, or other vehicle for the conveyance of goods, wares, or merchandise, or other personal property, for hire, from place to place within the limits of the city without first obtaining, for each vehicle so used (excepting one additional vehicle used temporarily in place thereof while undergoing repairs), a license from the Mayor and Council, who shall grant such license upon application, under such restrictions and regulations as they may prescribe, and they shall assign to each vehicle so licensed a number. A record of such license shall be kept by the City Clerk. Every person obtaining such a license shall pay therefor the sum of one dollar for the use of the city. Such license may be revoked at any time for any violation of the provisions of this section, or of the rules and regulations prescribed by the Mayor and Council. Every wagon or other vehicle so licensed shall be conspicuously marked with the number assigned to it by the Mayor and Council, in metallic or painted figures, and the name of the owner shall be plainly displayed on the wagon or other vehicle.

Section 11. Any person who shall set up, employ, or use any job team, wagon, or other vehicle as aforesaid, without obtaining a license as aforesaid, and any person so licensed who shall violate any provision of section ten of this chapter, shall be fined not exceeding ten dollars.

Section 12. All licenses issued under the provisions of this ordinance prior to April 1, 1911, shall date from April 1st, 1910, and shall expire on April 1st, 1911. All licenses thereafter shall date from the first day of April in each year, and expire on the 1st day of April of the succeeding year.

Section 13. This ordinance shall take effect upon its passage.

Adopted September 13, 1910.

#### TRANSFERRING BALANCE OF MACADAM APPROPRIATION

*Resolved by the Mayor and City Council of the City of Rochester:*

That the Finance Committee be authorized to transfer any balance now unexpended of the appropriation for macadam and permanent roads to the highway department.

Passed October 4, 1910.

#### WARD OFFICERS' PAY FOR PRIMARY ELECTION

*Resolved by the Mayor and City Council of the City of Rochester:*

That the Supervisors of the Check Lists and the officers of the several wards be paid for their services for the primary election in September from the Salary Department, at the same rate as at the State election.

Passed November 9, 1910.

**EXEMPTING MARTIN E. WELCH FROM TAXATION**

*Resolved by the Mayor and City Council of the City of Rochester:*

That Martin E. Welch, of Lynn, Mass., be exempted from taxation for a period of ten years on all stock in trade, machinery and capital to be used in the manufacture of boots and shoes or other articles, in a factory to be erected in said city by the Rochester Building Company.

Passed December 8, 1910.

**EXEMPTING ROCHESTER BUILDING COMPANY FROM TAXATION**

*Resolved by the Mayor and City Council of the City of Rochester:*

That the Rochester Building Company, a legally existing corporation, having its place of business in said city, be exempted from taxation for a period of ten years on any land and buildings it may own or erect in said city for manufacturing purposes.

Passed December 8, 1910.

Report of  
Superintendent Water Department  
For the Year Ending Dec. 31, 1910

*To the Committee on Water Works:*

GENTLEMEN :—From Jan. 6, 1910, when I assumed the duties of this office, until Dec. 31, 1910, the source of water supply of our city has been as follows :

Jan. 6, 1910 to July 24, 1910, reservoir ;  
July 24, 1910 to Nov. 24, 1910, Round pond ;  
Nov. 24, 1910 to Dec. 31, 1910, reservoir.

From July 24 to Nov. 24, the water level in Round Pond dropped forty-six (46) inches ; approximately .38 per day.

During the month of June several complaints were received concerning the taste of city water. I at once flushed the entire system and in a few days the cause for complaint entirely disappeared. Evidently this condition was due to the large amount of sediment conveyed to the Reservoir during the heavy rain fall of this month. No other complaints have been received and the water supplied during the year has given general satisfaction.

While the past year has been one of light rain-fall, and an unusually large amount of water has been used in road construction, at no time has the hydrant pressure been affected.

Samples of city water have been submitted to the State Board of Hygiene for analysis and reports received from that body have shown no evidence of contamination.

During the year a large amount of work has been done clearing the shores of Round Pond, and this work should be continued each year until the entire shore is thoroughly cleaned.

On March 27th, 250 feet of the bridge connecting shore with gate house at Round Pond was carried out by the ice. A float has been constructed and row boat purchased which will do away with constant repairs on bridge and expense of keeping it free from ice during the winter months.

The bed of canal from Berry Brook Dam to Reservoir has been cleaned ; the bushes have been cut on line of canal, on pipe line from Round Pond to Reservoir, and on pipe line below Reservoir Dam.

The roof of gate house at Reservoir has been painted, and new roofing has been put on tool house at Round Pond. The stand-pipe at Adams Corner has been thoroughly cleansed. The hydrants are all in good condition and are frequently inspected.

During the early part of the year a house to house inspection of the services was made. Many leaky fixtures were found, and a number of fixtures were found which had never been reported (see Section 4, Rules and Regulations) and from which the city has never received any revenue. Under the flat rate system it is impossible to fix a scale of rates equitable to all water takers and I believe the use of the meter the only fair method to all parties concerned. Should the entire system be metered, Round Pond, which is

considered by the State Board of Hygiene as the better source, would supply the city during the greater part of the year, and there would be held in reserve at the Reservoir a supply for emergency.

During the year fifty-six (56) meters have been installed at the request of the property owners, and with proper attention to leaky fixtures will result in a saving to the consumer.

The following table shows the number of each size of meters in use in the city :

$\frac{5}{8}$ -inch	$\frac{3}{4}$ -inch	1-inch	$1\frac{1}{2}$ -inch	2-inch	3-inch
78	105	17	2	2	1

Report of  
Superintendent of Sewers  
for the Year Ending Dec. 31, 1910

*To the Committee on Sewers:*

GENTLEMEN:—The annual report of the Superintendent of Sewers is herewith submitted :

Number permits issued to do plumbing	29
Connections put in during year	27
To date	1,025
Services relaid	1

Number feet main pipe laid during year :

School street, 6-inch	191
Winter   “   8-inch	1,007

Total feet main pipe to date	90,364
Miles   “   “	16 miles, 1,364 ft.

Number man-holes added	2
Rebuilt	2

The sewers have been flushed spring and fall, and were found in good condition.

I have been called to clean out thirty-two sewer connections; in most cases fibrous roots caused the trouble. The main on Portland stopped between man-hole No. 1 and Main street.

The sand basin at Willow Brook has been cleaned out twice.

I believe the entire system to be in good working condition.

Following is a list of supplies and tools belonging to this department:

Ys:

80 4-inch to 6-inch  
7 8-inch to 20-inch  
7 4-inch to 12-inch  
1 4-inch to 8-inch  
10 4-inch to 18-inch  
1 8-inch to 18-inch  
8 4-inch to 10-inch  
2 8-inch to 10-inch

Ts: 2 6-inch to 15-inch

Pipe:

27 feet 15-inch  
70 " 12-inch  
74 " 8-inch  
700 " 6-inch  
480 " 4-inch  
25 " 4-inch C. I. soil

Bends:

10 8-inch  
36 4-inch, quarter  
50 4-inch, one-eighth

CITY OF ROCHESTER

Test plugs :

1 6-inch

1 8-inch

1 10-inch

2 grade poles

1 plank puller

2 levels

1 brick trowel

1 " hammer

1 trench line

4 " frames

1500 feet trench plank

1 ditch pump

2 rubber diaphragms

1 jack screw

5 iron trench braces

12 feet 3-inch suction hose

2 tampers

3 pails

400 feet  $\frac{3}{8}$ -inch wrought iron pipe

300 "  $\frac{1}{2}$ -inch " "

300 "  $2\frac{1}{2}$ -inch hose (new)

About 2000 brick

F. W. CROCKER,

*Superintendent of Sewers.*

Report of  
Chief Engineer of Fire Department

*To the Honorable Mayor and City Council:*

In rendering my report of the Rochester Fire Department for the year ending December 31st, 1910, I would state that there have been 21 bell calls—two at East Rochester, one at Gonic, and 18 in the city proper; 20 still alarms, and three brush fires.

The amount of property involved was as follows:

Valuation of buildings	\$38,300 00
Insurance on same	26,000 00
Losses paid	1,520 00
Valuation of contents	5,000 00
Insurance on same	3,850 00
Losses paid	2,360 00

The three hydrants on the Square that belong with the pump at the Rochester Woolen Mill Company have been connected up and tested out, and it was found that only one good stream could be got, as the old pipe is too small.

I would recommend that a new 8-inch pipe be laid through the business section, with additional hydrants, for the better fire protection of that part of the city.

There has been purchased and added to the equipment two Boston play-pipes and 200 feet of  $2\frac{1}{2}$  inch fire

hose. The exterior of the Cocheco house has been painted, the Torrent house shingled and painted, also the fire station at Gonic.

I would recommend a permanently employed man to stay at the central fire station for day and night duty, and for quick attendance at fires within the city limits.

Also I would earnestly recommend that three new fire alarm boxes be purchased as early as possible this year.

In behalf of the Board of Engineers I will take this opportunity to extend our sincere thanks to all the members of the fire department for the promptness with which they have discharged their duties during the past year. We would also thank the members of the city government who have rendered the department any assistance during the year.

Respectfully submitted,

H. C. HANSON,

*Chief Rochester Fire Department.*

December 31, 1910

- 35 Portland street, near Fernald's grocery store
- 37 Silver street, near electric light station
- 41 South Main street, near Wallace shop
- 43 Upham street, near schoolhouse
- 47 Car barn, foot of Charles street
- 52 Charles street, corner May street
- 54 Charles street, corner Woodman street

## Signals

Two strokes of the bell is the all-out signal.

Six strokes of the bell is for a brush fire or a fire seen at a distance, where the department is needed.

One stroke of the bell is the Engineer's test.

The above signals are given only by the Chief Engineer.

## General Rules

Firemen, as well as citizens should familiarize themselves with the following rules for giving alarms of fire :

1. Never pull a box for a fire seen at a distance.
2. Never pull a box while the alarm bells are ringing, nor until a box has completed its four rounds. Two boxes cannot operate together, and neither will work if two are pulled at the same time. Never pull two alarms or two boxes for the same fire.
3. To ring in an alarm, break the glass in the key box, and open the outside door with the key. Pull down the brass crank, seen inside, till it stops ; then let go. Then let the box alone. The clock will be seen or heard to be running, and the alarm will follow in half a minute or so. Close the door, but do not try to

remove the key, as it is locked in a track lock and can only be removed by a release key, which is carried by each engineer, who will, as soon as convenient, release and return it. Remember that the firemen will come directly to the box which has been pulled, and be sure that some one stays at the box to direct them to the fire.

4. Never pull an alarm for a fire seen at a distance. Never touch a box except to give an alarm for fire.

Give an alarm for no cause other than actual fire.  
Don't give an alarm for a chimney fire.

# Report of Superintendent of Streets

*To His Honor the Mayor and City Council:*

GENTLEMEN:—In accordance with the required custom, I herewith submit the report of the work of the highway department for the year 1910, together with a list of tools which now belong to the department.

Increased interest is being awakened on the subject of improved roads throughout our state, and it seems to me, that good roads well-kept in repair is one of the features that vitally effects the interests of our citizens in general. There is a demand for a class of roads which possess better wearing qualities than what the material gives which we are using generally. Here in the city proper, where the heavy teaming is, it is a sandy surface in the most part, and soon breaks through.

The question of how to keep our highways in a passable condition, and at the same time to make any permanent improvement, is one that has troubled every administration for many years. With nearly 150 miles of highway to keep in repair, it leaves little money for new and enduring roads. Much work has of necessity to remain undone or be delayed until a convenient season, but in its essential points the work has been carried out as accurately as possible.

With the more liberal appropriation for the year, this department was enabled to construct the very

durable gravel road between the city proper and Gonic. We built a new piece of road on the highway leading to Farmington.

Among the permanent improvements we have made this year, is the macadamizing of a part of the new road to East Rochester. This work required 300 loads of stone that was all rolled by the use of the steam roller. Also a piece of macadam was built on North Main street from Stone bridge to Strafford square. We have graded Hancock street and a part of the old Dover road with gravel. In doing this work we used about 1,000 loads.

There has been considerable work accomplished in the outside districts with the road machine this year. We gave the best attention possible to the Swamp road, Rochester Hill road to the Dover line, Chestnut Hills road, Ten Rod road, Strafford road, and the road that passes the home of Arthur McDuffee.

In grading sidewalks throughout the city, we used about 400 loads of cinders.

Built 300 feet of brick sidewalk with edging on Pine street. Built 700 feet of brick sidewalk with edging on North Main street, and relaid some brick sidewalk at East Rochester and Gonic.

#### SURFACE SEWERS

We built 400 feet of new surface sewer on North Main street, also twelve drops and three manholes. In connecting these drops with the main sewer, we used 220 feet of 8-inch pipe.

There have been five miles of bushes cut this year.

## Machinery, Tools, and Material on Hand

1 stone crusher  
1 steam road roller  
3 sets two-horse sleds  
3 sets double harness  
3 two-horse dump carts  
2 one-horse        "  
1 pair wheels  
8 small shovels  
3 plows (old)  
6 post-hole spoons  
3 cross-cut saws  
1 hand roller  
1 jackscrew  
3 stricking hammers  
2 monkey wrenches  
2 road machines  
1 boiler and engine  
8 horses  
1 set one-horse sleds  
6 single harness  
1 stone barge  
10 picks  
10 coal shovels  
4 chains  
6 crowbars  
3 sets fall-blocks and ropes  
12 lanterns, with red globes  
12 hand drills  
3 sledges  
10 snow ploughs  
6 hoes  
3 turf diggers

2 long-handled shovels  
5 steel rakes  
3 brush scythes and snaiths  
4 street blankets  
3 horse brushes  
2 wagon jacks  
2 hand saws  
1 brush axe  
1 grub hoe  
2 pitchforks  
6 stone forks  
6 stable blankets  
3 curry combs  
3 mane brushes  
2 axes (old)  
3 spread chains  
3 two-horse scrapers

Respectfully submitted,

GEORGE T. McDUFFEE,

*Superintendent of Streets.*

# Report of City Marshal

*To the Honorable Mayor and City Council:*

GENTLEMEN :—I have the honor to submit to you the following report of the Police Department for the year ending December 31, 1910 :

The police force consists of the following officers, viz : C. A. Allen, City Marshal ; Albert F. Wilkinson, Assistant Marshal ; Ferdinand Sylvain.

## ARRESTS

Drunks	76
Larceny	12
Defrauding	2
Assault	9
Pickpocket	1
Non-support	2
Breaking and entering	1
Brawl and tumult	1
Keeping for sale	10
Adultery	2
Stubborn child	1
Fornication	2
Fast driving	1
Transporting liquor for pay	1
Indecent conduct	2
Selling liquor	5

Disposed of as follows :

Settled	26
Committed to House of Correction	23
Placed on file	2
Suspended	26
Gave bonds	18
Committed to jail	7
Discharged	8
Committed to Sheriff	1
Promised to pay	2
Mittimus at call of Marshal	8
Nol Prossed	4
Continued	2
Committed to Industrial School	1
	— 128

Amount of fines and costs collected	\$421 09
Witness fees, etc.	9 94
	— \$411 15

Paid Treasurer	\$411 15
Number of lodgers	1,451

In addition to the cases enumerated, service has included the investigation of many matters that have not been brought before the Court, attending to many complaints and devoting much time in the effort to preserve order, protect property, and enforce the law.

I am pleased to say that the officers under my command have been prompt and efficient in the discharge of their duties.

Respectfully submitted,

C. A. ALLEN,  
*City Marshal.*

Houses fumigated by Health Officer	31
Rooms        "            "	121
Complaints investigated     "	19
Dead animals properly disposed of	10

Respectfully submitted,

D. L. STOKES,  
FORREST L. KEAY,  
CHARLES E. GOODWIN,

*Board of Health.*

## Report of Tree Warden

*To the Honorable Mayor and City Council:*

The year of 1910 has been one of interest and progress for the benefit of our city trees.

The city has purchased a spraying machine which sprays the trees quickly and does good work, doing away with the old method of cutting the trees. It is not only a great saving of time and money, but is death to all leaf-eating insects.

There has been a large amount of dead wood removed from the trees, and more work would have been done had the appropriation been larger.

The city is setting new trees each year. This year there have been about 208 trees planted : 30 rock maples and 100 poplars on the common, and 78 elms on the streets. Quite a large number have been planted by private parties on the streets, which is a move in the right direction and hope they will continue in the good work.

Respectfully submitted,

C. E. GOODWIN,

*Tree Warden.*

GENERAL READING ROOM

Report of the Trustees  
Of the Rochester Public Library  
1910

At a meeting of the trustees of the Rochester Public Library, December 30, 1910, it was voted that the report of the secretary, librarian, and treasurer be presented to the city council as the annual report of the trustees for the year 1910.

## Report of Library Trustees

*To the Honorable Council of the City of Rochester:*

GENTLEMEN :—The seventeenth annual report of the Trustees of the Rochester Public Library, with the report of the librarian, and the Treasurer's report is respectfully submitted for the year ending December 31, 1910.

The continued increase in the circulation of the Public Library is a matter of congratulation to the trustees. As the report of the librarian will show a circulation of 52,650 volumes, an increase over last year of 4,014. Also the branch libraries at East Rochester, Gonic, and Meaderboro, having been visited by the librarian during the year, are reported to be in a most satisfactory condition. The trustees appreciate the work done at the Gonic branch by Mr. Marsh and would gladly aid him in making that an ideal library if we had the means. We also express our thanks to Mrs. Charles S. Brock of the Meaderboro branch for the time and work given in distributing, during the year, 634 volumes for the use of that section of our city. It is the endeavor of the trustees to meet all demands of the patrons of the library.

A call is made for an additional catalogue of the library but the lack of funds prohibit the trustees from meeting this demand as it would require a large amount of extra work and expense of printing. The steady

growth of the library each year increases the amount of work and in order to keep it up to its present standard, additional help must be provided in the near future.

It is the purpose of the trustees to meet the intellectual needs of the public and assist in maintaining intelligence and character in our city, for this purpose we respectfully ask the Honorable Council to continue the appropriation of \$3,000.00 for the year 1911.

The trustees wish to express their appreciation of the faithful and efficient service rendered the public by the librarian and her assistants during the year.

For the Trustees,

JOHN YOUNG,

*Secretary.*

## Report of Librarian

*To the Board of Trustees of the Rochester Public Library:*

GENTLEMEN:—In presenting this seventeenth annual report of work of the public library, I can tell you of no new departments added or of no new work undertaken, for the steady rush of patronage, the ever increasing routine work, and the many legitimate demands made upon us, have consumed every moment of time. Even the figures, herewith presented, cannot tell you of the busy days which have gone to make up this year, 1910.

New books seem, to the large majority of patrons, the most important feature of library economy. This year the number purchased has not only exceeded that of previous years in quantity, but in quality. Never, has greater care been exercised, nor books so thoroughly reviewed, that only the best might be purchased. Seventy-five of the books added have been duplicates, new editions of old standards, or of the most popular books of the day; thirteen have replaced worn-out books; 100 have been juvenile stories, eighty-eight of which were purchased from the Jennie Farrington fund; 175 have been fiction, largely of the new and popular variety; and the rest, books of greater importance, every class represented in the library having had valuable additions.

The assessments of the year have been as follows :

Number of books purchased from the general fund	563
Number of books purchased from the Jennie Farrington fund	88
Number of volumes added by binding	56
Gifts	49
Total additions for the year	756
Number of volumes lost, destroyed or withdrawn	22
Entire number of books in library at date	14,457

The interest in books as a source of entertainment, and the habit of depending upon the library for information on practical subjects is well-fixed. The following statistics of circulation will give some idea of the number of books given out :

Books given out from the main desk	35,405
Children's room	12,097
Total circulation at the library	47,502
Increase over last year	3,670
Number of books given out at stations	5,148
Entire circulation for the year	52,650
Increase over last year.	4,014

The agencies have now been established long enough to prove their usefulness to the sections of the city where they are placed. No doubt their growth in circulation is hampered by an inadequate collection of books. The large majority of the readers, at the agencies, want light fiction or new fiction, and books of

this sort are not added fast enough to satisfy the demand. Two thousand and sixty-three volumes have been sent out to the different agencies during the year, visits to them show the books to be kept in good condition.

The Gonic agency is still doing excellent work. It has been open to the public 101 days, and 3,226 books have been given out; 288 more than last year. Mr. Marsh still maintains a reading-room in connection with the circulating department. In addition to the nine periodicals provided from library funds, several are contributed by patrons. Many things are needed to make this room more attractive, such as tables, lights, and a suitable desk or table for the librarian as he has to do his work with few conveniences.

The East Rochester agency does not ask for many books, as they are not entirely dependent on the library for reading matter. They have given out, during the 105 open days, 1,288 Rochester books.

Perhaps no part of the library service is carried on with a more genuine love for the work and the community than the little agency at Meaderboro. Mrs. Brock asks no other reward than the pleasure of handling the books, and the happiness which she gives her neighbors and friends. She has given out 634 books during the year, and surely deserves great commendation for the good work she is doing.

If more of these small agencies could be started and maintained, the library could be enjoyed to some extent by the outside districts, as well as by those within easy reach of its doors.

With the pressure of the year's work and the limited staff, it has been a source of regret, that less

work could be done with the individual. Nevertheless, reference assistance has been given to those needing it, as far forth as time permitted. Eleven thousand and seventy-two readers have been reported, not as many as last year, but as there has been no noticeable dropping off of readers, and as the reference work has taken much time, it is possible that all have not been counted.

The library has received a few gifts this year as you will note by the list of gifts appended. The exhibits of pictures, furnished through the kindness of the Rochester Woman's club have proved not only interesting, but instructive. Miss Evelyn Tucker, a student at the Eric Pape Art School of Boston, kindly placed some of her studies in the children's room for a few weeks. These were greatly admired by young and old.

As we think back for items that will give you some conception of the work of the year, there seems little to tell, but it is always the unwritten work which counts for most. The busy occurrences of the daily life of the library, that which denotes progress to us, cannot be summed up by figures. The increasing circulation, the work with the stations, the enlarging correspondence, the preparation of reading matter, the answering of questions, the adding of new books, and the care of old ones, brings each day an endless amount of work. The number of books rebound has been smaller this year than last, but the mending list shows 4,354 books repaired. This does not include renewing slips or labels.

Another source of regret, is that as the circulation has increased, the proportion of books given out in the classes has decreased, and the demand for standard fiction has been very small. As far forth as possible,

these good things are kept well to the front, but few know that the library can furnish something on almost every subject, as well as the best things in literature and history. More and more does it seem necessary to print a supplementary book list, giving the books which have been added since the catalogue of 1899 was issued. Then, it would seem advisable, to admit those interested in better reading, to the shelves containing the classes, at least on certain days each week. The card catalogue, no matter how carefully perused, does not always convey to the seeker all that he wants to know about the books on his subject.

We make no promises for the future, but sincerely hope that the past may be but a harbinger of the years to come, and trust that this record of a busy year will be the proof of the conscientious and painstaking work of the entire staff.

The entire staff joins with me in expressing their appreciation of the never-failing courtesy and consideration of the Board of Trustees.

Respectfully submitted.

# Report of the Superintendent of Schools

---

*To the School Board of Rochester:*

GENTLEMEN:—I herewith submit for your consideration the annual report of the Superintendent of Schools, together with reports of the Principal of the High School and the Supervisor of Music.

In assuming the position of Superintendent of Schools of Rochester I may say that the duties of the office have been taken up with no desire to carry out any special plans or to make any radical changes. The idea has been and still is to increase the efficiency of the schools by proceeding along well established and thoroughly approved lines. Having come to the office of Superintendent on the first day of August, whatever I may say at this time is of necessity from a somewhat limited point of view. Yet some of the problems connected with the management of the schools of the city have been studied to some extent and it is possible to speak with some degree of certainty concerning these.

## SCHOOL BUILDINGS

In the last report of your former Superintendent attention was called to the fact that there was a serious lack of proper school-room accommodation in the city,

especially, for the children living to the east of the railroad tracks. During the year just closed, attention has been given to this matter and as a result a new, eight-roomed school building has been constructed on the old School street lot, the lot having been enlarged by the purchase of adjoining land. This new building with those already in use will give to the city ample room for its schools for a long time to come. An appropriation of seventeen thousand dollars was made by the City Council for the construction of the new house, and the building committee will undoubtedly be able to finish the building and possibly grade the grounds, with the above named amount. The new building will be ready for occupancy at the opening of the spring term.

### REPAIRS

During the year repairs have been made on the school buildings in use, costing about one thousand dollars. These repairs consist chiefly in new concrete in the basement of the Allen building, paints, painting and varnish at nearly all the buildings, shingling at the Meaderboro building, and four new hardwood floors at the Allen building. All the structures used for school purposes are now in a fair state of repair, but each year must see something done in order to keep them where they are.

The city now has or will have seven school buildings in use. All of the old and unused buildings have been sold in accordance with a vote of the City Council.

### SCHOOLS

During the past year the city has maintained thirty schools, exclusive of the High School. This makes the

number thirty-one in all. These schools have been located at the following named places: Ten schools have held their sessions at the Allen building, five including the High School, at the High School building, three at the Maple street building, one at the School street building, six at the Gonic building, five at the East Rochester building, and one at the Meaderboro building. During the term just finished the School street school has been in session at the St. Mary's Parochial building where it will remain until the opening of the spring term. This arrangement was a necessity since the old Upham street building had been sold, and the old School street building had been removed to make room for the new structure. The arrangement has worked satisfactorily; still, all will be pleased to be in the new building as soon as possible.

Considering the schools as to grades the number in each grade is as follows: There are four schools in the city, of the first grade, four of the second, three of the third, three of the fourth, two of the fifth, two of the sixth, one of the seventh, one of the eighth; one of the first and second, one of the second and third, two of the third and fourth, two of the fifth and sixth, three of the seventh and eighth, and one, the Meaderboro, of all grades.

From the above it will be noted that we have a somewhat large number of schools of two grades. In some cases the double grade school is a necessity, in others, with our new facilities, this arrangement may be avoided.

It now appears that no additional schools need to be opened during the coming year. It would be well, however, to make some arrangement as soon as it can be

readily done by which we may have two seventh and two eighth-grade schools in the section of the city which is sometimes designated as Norway Plains, instead of the one seventh, one seventh and eighth, and one eighth which we now have. This arrangement would reduce the number of pupils in each of the schools just mentioned ; it would permit the bringing in of the eighth grade at Meaderboro, if this should be found desirable, and it would enable us to fit in a better way for the High School, which, with its state approved courses, is demanding more and more of the grades.

### THE TEACHING FORCE

The teaching force in the schools of the city now numbers, including Mr. French the teacher of music, forty. Eight of these constitute the board of teachers in the High School. But one teacher has been added during the year. This was a teacher of Mathematics and English who was added to the corps of teachers in the High School. So far as is now known no additional teachers will be required during the year ensuing. The changes of teachers in the High School are noted in the report of the Principal of that school and so need no mention here. The loss of teachers in the grades has been less this past year than usual, and this has had a good effect upon the schools.

In every school or system of schools, it is the teacher after all who counts for most in the educating of the child. Rochester has at present a body of strong, conscientious workers in her school-rooms, many of whom are working many more hours per day than are ever credited to those giving instruction in the schools.

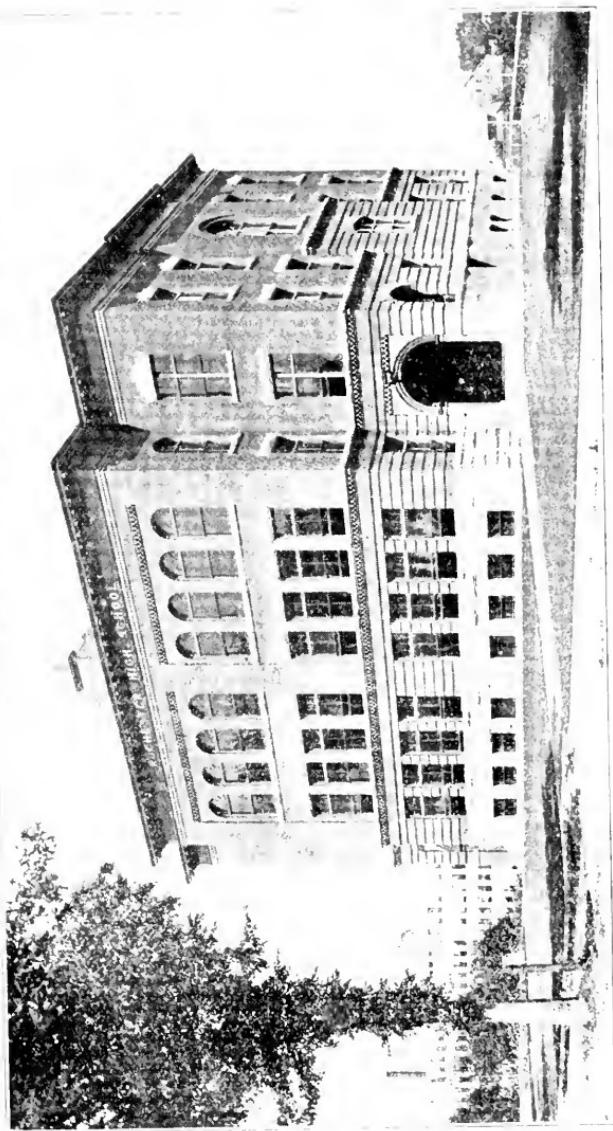

### COURSES OF STUDY

The courses of study in the Rochester schools are based on the state courses as outlined by the State Superintendent. The High School is one of the approved High Schools of the state. In consequence, its courses of study must meet the approval of the state.

There was a feeling at the close of the schools in June that the Commercial Course in the High School needed strengthening. In consequence, your former Superintendent and some of the members of the School Board set to work on a revision of the said course. A draught of this revised course was handed me at the commencement of my duties as superintendent, for my consideration. The course as revised was sent to Concord for State approval, but approval was refused on the ground that the course as revised was weaker than the other courses of the High School and therefore a temptation that would draw pupils from the other courses. A commercial course was finally arranged and approved, and it is in use in the High School today.

It is felt by many that, if commercial courses in high schools are to be of much benefit to those taking them, much actual business, so to speak, should be done, in other words, that the pupils should put in practice daily what they are learning. To give this practice in our High School it would be necessary to fit a room with the proper desks, stations for banks, stores, etc., for we now have nothing in this line of outfit. If this should be done, then, with school money, certificates of property, blanks for notes, receipts, etc., actual business, so to speak, might be done that would be of great help to those taking the course. If a room should be fitted out as suggested, there would be some extra cost in teaching the course during the first year, but practically none

ROCHESTER HIGH SCHOOL.

after that. What has been said is simply a discussion of the commercial course. No action is urged at present.

The Commercial Course is one of the best. It is a popular one with both parents and pupils. It must, however, be thoroughly mastered to be of value.

### METHODS

The methods pursued in giving instruction are largely the approved normal methods. There have been as all know great changes within the last twenty years in the methods of teaching. While many of the changes have been and are of great value, yet it is a serious error to throw aside all the principles of our fathers simply because they are old or to label everything progressive because it is new.

### COURSES AND METHODS

There is a feeling, more or less prevalent, that the work in the High School is in some degree difficult for pupils of medium ability and that, because of this, many are failing to complete four years of work in that school.

Failure in High School work is confined to no locality. It is found everywhere. There is considerable of it in New Hampshire. The State Superintendent's report on work in the school-room in secondary schools, for the year 1910, gives some figures concerning it. According to that report, the failure in Advanced Arithmetic throughout New Hampshire for the year, was 14 per cent. The failure in first year work in Algebra was 19 per cent; that in Algebra II, or what seems to be second year work, amounted to 11 per cent; that in

Algebra III, Algebra review with some advanced work, amounted to 3 per cent. The failure in Latin in first year work was 12 per cent; that in second year work amounted to 7 per cent; that in third year work amounted to 5 per cent; and that in the fourth year work, to 2 per cent. These seem to be rather large percentages, especially, those in Algebra. The reason for such an amount of failure, is by one educator ascribed to one thing and by another to another. Some High School instructors feel that it is due to poor preparation in the grades. Some Superintendents think it due to poor teaching in the High Schools. Some say it is due to lack of interest, others, to lack of ability on the part of the pupils.

There is probably something of all these things responsible for the failure of many pupils. To say, however, that 14 per cent of our pupils taking Advanced Arithmetic cannot pass it, to say that 19 per cent, 11 per cent, and 3 per cent of the pupils in the divisions of the work in Algebra, leaving out those who barely get through, are failures; to say that the pupils represented by the percentages in Latin, cannot get along in the subject under proper conditions, is making an assertion that many parents and school officials, as well, find difficulty in believing. We cannot cut the basis from beneath any subject and then expect pupils to master it readily. The methods of doing college work cannot well be used in the secondary schools. The back bone of a subject should be learned in the secondary schools, and this largely from one or two books instead of a dozen. Side reading, that sides to nothing in the pupil's mind and many notes of this and that distract the child mind, rather than broaden it.

There is, to the minds of many, not enough work

in Arithmetic given to properly support Algebra, and there is not enough time given to the mastery of the principles of Algebra, as they think, to enable the pupil of medium ability to obtain a usable knowledge of the subject. These people are correct in their judgment in a very large degree. There should be some High School Arithmetic.

What has been said of Algebra may, in a great measure, be said of other studies. The courses of studies and the methods are largely to blame for the difficulties of many, many students. A boy fails in Algebra when he would not in Advanced Arithmetic. He cannot change from one to the other. He loses interest, asks for a certificate enabling him to go to work, and goes out of school a disappointment to himself and to his parents. A few things well taught to each pupil, according to his ability, will do away with much of the failure that now takes place.

No pupil should go from the schools of the State without knowledge enough to properly record his business transactions of the day when it comes night. This now, in many instances, is not the case. We should keep the children in the schools as long as possible. We have the costly buildings, the expensive up-keep, the teachers under pay. Each child should have opportunity according to his ability. It gives a real teacher a heart-ache to see a pupil drop from school when he knows what the trouble is, but is unable to reach it because of some arrangement beyond his control.

A hopeless class of children is sometimes mentioned. There should be no hopeless class of children anywhere, as far as having proper schooling is concerned. It is from the hopeless class that crime and pauperism

spring, and if the schools are to help rid the nation of these evils, they must go down to the lowest child, stay near him, touch his sore spot and heal him, courses of study or no courses, methods or no methods, as the case may require.

### MUSIC

There is great interest on the part of the pupils, in the music as taught by Mr. French. Very few pupils desire to be excused from it. The music seems to round out the school work in both the grades and the High School.

The work in music is being more and more systematically done. We need supplies, however, in this department, as well as in the others, to secure the best results. Some new material has already been added. The matter of music will be found more fully treated in the report of the music teacher, Mr. French.

### TEXT-BOOKS

For some time there has been a great lack of text-books in all the schools. As many new books as the financial conditions would permit have been purchased and put into the hands of the pupils, but still there is a pressing call for more. During the coming year an attempt will be made to properly supply all schools with ample working material and to number and properly record all text-books. Each school should be properly supplied with books that should be the permanent possession of the school. They can then be properly looked after by the teacher and much damage and loss pre-

vented. The transfer of many books from one school to another results in much injury to them.

Two new books have been adopted during the fall term and put into use. These are a new Commercial Geography and a new Rhetoric.

### SCHOOL SESSIONS

At the opening of the schools in September the one session plan again went into effect in the High School. The arrangement thus far has given a good degree of satisfaction. The one session plan is one that is favorable to the pupil in that it furnishes opportunity for the teachers to give personal attention to him in case he needs it, and it is favorable to the teacher in that it enables that one to get through with his papers in the written work in season to have a good rest before the work of the next day begins. A teacher working till three o'clock or later in the school-room and then correcting papers till a late hour in the evening is not at his best at the opening of the school the next morning.

Changed methods in giving instruction must necessarily, it would seem, affect schools. The objections to the one session arrangement are, of course, the charged hour for the noon meal, the tardiness that it seems to engender, and the opportunity given to waste time on the streets. These are certainly matters of much importance and they must always be given consideration in the adoption of any arrangement for school management. No plan that has yet been devised is perfect, and it seems impossible to formulate one that will be the best for everyone and everything. We must, then, get along with that one which best meets present conditions.

## FINANCE

The matter of finance is an ever important one in all public matters. Here at the beginning some of the reasons for the increased cost of schools may well be stated. Better buildings are being provided for the schools. Better care is necessary for the better buildings. The better appliances for heating and ventilating are more costly to keep in repair. Where formerly one primer answered for a child, now, each must have five or six. Where formerly one book per pupil on Geography was sufficient, now, five or six geographical readers in addition must be had, if we keep up with the modern methods. The pressure from those above us in school matters is ever heavy for more and better outfit. These are some of the reasons why school expenses increase.

At the present time Rochester is spending nearly onethird of its revenues for school purposes, not counting the amount spent for new construction. Our city, however, is no worse off in this particular than very many other cities and towns of New England. In some places the amount expended for schools goes even higher, and nearly one-half of the municipal funds is used for educational purposes. This large amount devoted to educational purposes would not seem to be a serious matter anywhere provided a limit to the proportionate amount of a city's funds to be devoted to the schools appeared at some point. This limit does not as yet appear. The tendency is rather almost everywhere to increase the ratio than to diminish it. Such being the case, it is not to be wondered at that the tax-payer sometimes asks whether or not there is to be any limit to the proportionate amount of municipal funds that may be expended for school purposes. The question

raised by the tax-payer is a good one for the consideration of us all. It certainly seems, in view of the many necessary things for which public money must now be expended, that onethird of the revenues of any municipality should be deemed sufficient for the support of its schools.

But if the amount which a municipality can expend upon its schools is limited to the proportion mentioned, what is to be done as to many of the things advocated as necessary to be taught and done in the schools? There is but one answer. Let the parent and the child do some things for themselves or let these things be omitted.

At the present time there are free text-books, free supplies, and free transportation. School buildings are equipped with all modern conveniences. These are all good things to have but they cost someone something. We all love the children with a high and holy love, but we cannot give them everything and it is not wise to do so. When we go beyond the bounds of what is reasonable and sensible in bringing up and educating a child, we, in a large measure, nullify the thing we are trying to do, namely, to make him an intelligent, self-respecting, self-supporting individual in the community in which he may live. There comes a time in the life of everyone when he must, in a great degree, depend upon himself. Would it not be well to let every child as a part of his education learn the cost of his training by bearing a portion of it? By this, it is not meant that we should revert to all the old conditions of our fathers. It means that the child should turn a portion of what he is now spending for sweetmeats and entertainments to the purchasing of some of his school supplies. That he should find the value of a dollar by

having to earn one now and then, and spending it for some personal need.

The children educated in the most expensive public schools do not, so far as is known, greatly if at all, surpass in taking prizes or in getting positions and holding them, those from some of the schools that teach fewer things but teach them well. Why, then, the call for everything for every child?

There is no desire in what has been said to cut down expenses to the injury of our school system, but there is certainly a desire to keep the matter of school expense within reasonable bounds. It is believed that too many of our educators call for the introduction of many things into the schools without counting the cost or the real effect upon the child and the community. We are living in an age of extravagance, but that does not necessarily mean that we need to be extravagant in any particular.

### JANITORS

The city now employs seven janitors. These men have in charge the school property of the city. They need to be, and I am happy to say they are, trusty, faithful men. Few realize how much depends upon these men to keep things running smoothly. They must be up early and home late, they must be gentlemanly but firm in doing their duties. No High School in the state has a better man than Mr. Rafferty.

### DISEASES

During the year and especially during the fall term the schools have been more or less afflicted by those

ever-prevalent diseases—the measles, mumps, whooping cough, pediculosis, etc. These diseases have affected the attendance to some extent. In dealing with these diseases the policy has been to exclude those pupils seriously affected and to keep those in the schools as free from contamination as possible. There is a lack on the part of many parents in looking after the physical condition of their children; as a consequence, the children of those who take pride in cleanliness and tidiness suffer. There is a constant effort being put forth by the Health Officer and the teachers to check diseases and vermin. Whatever is done by these officials is always prompted by and carried out in a spirit of kindness, and with a view to the betterment of school conditions.

#### CLOSING REMARKS

In closing I desire to thank, the teachers, janitors, and all the school officials for their many favors and loyal support.

The enrolment, percentages, and other statistics may be found on the last pages of the report.

Respectfully submitted,

EVERETT A. PUGSLEY,

*Superintendent of Schools.*

Report of the  
Principal of the High School

To Superintendent of Schools E. A. Pugsley:

DEAR SIR :—I submit herewith the annual report of the principal of the Rochester High School. With many of the conditions and needs mentioned you are doubtless familiar, but at this time they merit especial attention.

Attendance statistics for school year ending June 1910; and for the fall term ending December 1910:

Class	Total		Average		Average		Per Cent		Cases		No. Not Absent or Tardy		No. Left	
	Enrolm't	M'mb'rship	Attendance	Attendance	Attendance	Attendance	Tardy	Tardy	June	Dec.	June	Dec.	June	Dec.
	June	Dec.	June	Dec.	June	Dec.	June	Dec.	June	Dec.	June	Dec.	June	Dec.
1910	34		32.73		30.67		93.70		184		0		2	
1911	45	36	43.02	35.64	41.41	34.23	96.25	96.04	105	51	4	11	5	2
1912	46	40	44.27	37.27	42.32	36.18	95.59	97.07	108	40	4	18	5	2
1913	81	54	69.90	51.99	66.55	50.62	95.22	97.36	91	73	9	18	11	3
1914		68		64.85		63.		97.14		72		24		5
P.G.	2	2											2	2
Tot	208	200	189.92	189.75	180.95	184.03	95.27	96.99	488	236	17	71	25	14

The smaller enrolment of 1910 is explained by the fact that sixteen of those graduated from Grammar School did not enter High School and twenty-five members of the upper classes did not return in September.

Tardiness statistics show a serious condition. With one session, which diminishes opportunity for tardiness by one-half, we have had this fall term nearly one-half as many cases of tardiness as are recorded during the whole of the year ending June 1910. It is to be noted, however, that all this tardiness is caused by eighty pupils, seventeen of whom have been tardy five or more times each. (This record does not include those who have standing excuses on account of train or car accommodations.) Parents are urged to cooperate with the school in reducing the amount of tardiness.

The eyes and ears of 165 pupils have been examined with results shown below:

Pupils examined	165
Glasses worn	21
Right eyes below normal	14
Left      "      "	11
Both     "      "	20
Right ears      "	9
Left      "      "	5
Both     "      "	18
Pupils whose teeth need attention	37
Pupils whose teeth are bad	12
Both eyes and ears below normal	10
Both eyes and ears normal	69

Fifty-one per cent of all eye and ear deficiency, and 76 per cent of those whose teeth need attention are found in the first-year class. These results appear

rather better than in many other city high schools, yet a general medical inspection seems desirable.

Of 183 pupils in school in June 1910, 114 were promoted without condition, 30 were promoted with a condition in one subject, and 37 failed in two or more subjects and were not promoted. Fifty-three per cent of those promoted on condition, and 57 per cent of those not promoted were first year pupils. The similarity of these percentages to those of eye, ear, and teeth deficiency is striking. Corresponding figures cannot be given for this fall, but according to reports of our 186 pupils, issued in December, 32 failed in one subject, and 45 in two or more subjects. A daily average of 20 pupils has been required to return to the school building for extra study under the direction of the teachers, and many failures have been made up successfully in this way ; but the number of failures is larger than it ought to be.

In this connection it is a noteworthy fact that at the beginning of the fall term 1910, there was only one teacher in the school who was there in the fall of 1909. It has thus been necessary for pupils to adjust themselves in a year to a practically new faculty, and for the teachers in turn to become acquainted with about two hundred new personalities. This condition is occasionally found in cities of the size of Rochester, yet if results of a high order are to be expected, special effort must be made to get and keep successful teachers.

The addition of one teacher, made in the spring, has reduced the average size of the divisions to 19.3. In most subjects divisions of this size are well adapted to the necessities of class teaching. With the occupancy of the new building by the grades we shall have two

additional rooms, which will relieve the congestion in the science laboratories, and greatly facilitate the general administration of the school.

The general attitude of the pupils towards their work and the school is good, but too few have a definite purpose. There are 53 who intend to go to college, 20 who wish to go into business, 16 who think of teaching, and 90 who are undecided. Among the last are 30 juniors and seniors, some of whom will decide on a particular line of work too late to readjust their courses without loss of time. If their decision is to go to college, it may then be asked why our High School does not prepare for college in four years.

That the course of study of the Rochester High School is comprehensive enough to prepare for college is evidenced by the fact that the New England College Entrance Certificate Board has recently renewed our certificate privilege for three years, after an examination of the school course and because of the good record of our graduates who have gone to college during the last three years. This means that our graduates may be admitted to any one of thirteen New England colleges without examination in subjects in which they have the recommendation of the school; such recommendation is given in subjects which have been passed with an average of eighty per cent or more. In the year 1910 six full and two partial certificates have been granted by the school and accepted by colleges.

During the year there have been added to the curriculum a second year in German, a full course in Commercial Geography, and the time devoted to Business Arithmetic and to Business Law has been doubled. I believe further changes should be made in the near

future. We need a course in Science for the second year, in English History for the third year and in Drawing available for all. Elementary mathematics should be reviewed in the third year instead of in the fourth year as now, and Advanced Mathematics should be taught in the fourth year instead of in the third. The last change would make it easy for those who intend to enter college on examination, by enabling them to take preliminaries in mathematics at the end of their junior year.

The equipment of our laboratories is in fair condition, though some old apparatus needs to be replaced, and some additional pieces should be purchased soon. The efficiency of our Commercial Department would be greatly increased by the furnishing of one room with desks suitable for bookkeeping, and with facilities for office work and business practice.

Perhaps the greatest need at the present time is a good library for reference and for supplementary reading. The satisfactory teaching and study of history, literature, and other subjects in our curriculum require a large amount of reading outside the text-book. College and state authorities require it. For the history outlined in our course the State requires an approved school to have a minimum of 71 volumes for supplementary reading. Of these less than ten are on our shelves. The State requires members of our English classes to read each year outside of class and pass an examination on six classics chosen from a list of eighteen. Of this total of 72 volumes we have one copy each of less than twenty-five while we need two copies of each. All study and reading requires easy access to an unabridged dictionary. To meet the requirement of nearly 200 pupils seated in six different rooms, we need at least six unabridged dictionaries. Of these we now have two, one

of which is in very poor condition. To supply needed books the teachers have used their private libraries freely, one teacher having nearly 200 of her books in use at the school this year. Our Public Library has been and is now most generous in buying and loaning books to us, but it cannot take the place of a school library.

In conclusion, I desire to express my appreciation of the conscientious and efficient work of the assistant teachers, the cooperation of the Superintendent of Schools, and of the support of the School Board and of the general public.

Respectfully submitted,

WILLARD H. BACON.

## Report of Supervisor of Music

---

*To the Superintendent of Schools:*

SIR:—I have the honor to submit herewith my annual report of the Music Department.

In regard to the general interest on the part of both teachers and pupils, there is little of detail to mention. I would say that the grade teachers are cooperating perfectly, and that the pupils are responding splendidly to the efforts put forth in their behalf. If there are any exceptions to the last part of the statement, they are only enough to prove the rule; and the progress now being made is more satisfactory than ever before.

It may not be out of place to note the fact that in many of the rooms the books have become badly worn, and in some cases unsanitary, and new ones should take their places. It seems to the Supervisor that it would be more economical in the long run if every room were to be supplied with books, instead of passing the same set from room to room, as is done in some cases where there happen to be two classes of the same grade in the building. If each pupil were to be charged with a book and held to a strict accountability for pencil marks and torn pages, it would tend to an enhanced respect for the city's property, and thereby a not unimportant part of each child's education would be considered.

There are now in use in all the primary grades, pamphlet editions of sight reading exercises for individ-

ual practice, consisting of scale studies and classic melodies, selected and carefully graded so as to fit the varying abilities of the children as to natural endowment. These exercises have proved a stimulus to the interest of the pupils as individuals, and we shall be able to state definitely at the end of the school year the standard of ability of every individual pupil in the primary grades, and just what kind of an exercise represents his or her attainment in individual performance. Materials of like character should be furnished these classes from year to year as they advance in the grades, only adapted to their higher attainments. There is no good reason why a large majority of our pupils should not be able to read and vocalize at sight, exercises containing technical problems within the scope of their practical experience, as readily as they would an equally difficult paragraph in English.

I desire to express my sincere thanks to all my fellow teachers, the pupils, the School Board, and the Superintendent for the helpful cooperation which has rendered my connection with the schools of Rochester so pleasant, and has contributed so largely to whatever of success may have crowned any efforts during the past year.

Respectfully submitted,

A. E. FRENCH.

# Financial Statement

## Summary of Receipts and Expenditures

### RECEIPTS

Balance from 1909	\$ 218 68
Appropriation by City Council	28,500 00
Received for tuitions	303 76
Old flooring	2 00

IVA WHITEHOUSE

Girls' Chorus—Barcarolle . . . . . Küchen

### Address

REV. SMITH BAKER, D.D.

## Girls' Chorus—The Sun Worshippers (Indian Melody)

H. W. Loomis

### INDIAN MELODY

Valedictory

LUCIA GREENFIELD

## PRESENTATION OF DIPLOMAS

SINGING OF CLASS ODE

## Class Ode

Words by Leon F. Brown

Music by Sara E. Greenfield

Dear classmates we've come together today,  
This gath'ring our last one may be ;  
Each duty 'twas ours we welcomed as play  
Our hearts were so happy and free.  
Whatever our hopes had been at the start  
In measure they have been fulfilled ;  
And as in our life-work, we do our part,  
On firmest foundation we'll build.  
Faith make us strong.

With feelings of awe we met on the shore,  
To launch our frail bark on the lea,  
Of all those who wished fair haven to reach,  
Not all that safe shelter now see ;  
'Mid ocean's deep waters tempests have roared,  
And thickened the gloom all around,  
Yet higher still higher near Hope's star we've soared,  
To goal where calm waters abound.  
Hope lead us on.

Dear classmates farewell, in parting we say,  
May future be fair as the past ;  
And friendships so true which hold us today  
Continue as strong to the last.  
May pleasantest thoughts supreme in our mind,  
Forever our mem'ries enthrall,  
With faith in the One Who our path divined,  
We'll meet when our Master doth call,  
Classmates farewell.

**Class Roll, 1910****CLASSICAL COURSE**

Burnham Walbridge Annis	Edna Jane Bernice Leake
Edla Cater	Ruth Lightbody
Genevieve Mertelle Dustin	Florence Martha Osborne
